PETUNIAS, NANA COMPACTA GROUP.

This group of petunia comprises the largest list of plants that are suitable to the Nth degree for all bedding work. The compactness of the plants together with the fine growing qualities of this group make Nana Compacta Petunia the Number One Petunia on most good growers flower seed list. Perhaps the class of Petunias that come under the heading of Dwarf Giants of California come a close second to the Nana Compactas.

## ZINNIA SEED

ZINNIA,

CUT AND COME AGAIN TYPE,		
Snowball, Canary Yellow, Fireball, Spun Gold,		
Salomon Pink, or mixed	.15	.60

Editors Note: Zinnias make up one of the greatest classes of cut flower material for the retail florist. A small amount of care is necessary to get a good crop started and once the plants are on their way care can be somewhat relinquished. Zinnias do need water and fertilizer to get the best results. Sow into the open field late in May and there will be no loss from frost or damping off from getting chilled. ZINNIA PLANTS LOVE THE HEAT and grow best when the weather is warm. Berco Seeds does recommend the use of the best seeds, especially the DAHLIA FLOWERED TYPES,

DAHLIA FLOWERED TYPES ,	30-36 inches	
Canary Bird, fine yellow		Meteor, Amaranth rose

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The population of the United States has increased from about 100 million in 1900 to over 200 million in 1950. At the same time, the population of rural areas has decreased from about 100 million in 1900 to about 50 million in 1950. This has led to a concentration of the population in urban areas, which has had a profound effect on the economy and society.
